University of Colorado at Boulder Online
 Master of Science in Data Science Expected January 2026

The City College of New York
Bachelor of Science in Applied Mathematics

New York, NY
December 2021

Data scientist with experience applying analytics to business, sports, and urban transportation challenges. Built a PGA DFS model achieving a 3.0% weekly ROI, reduced shipping costs by 15%, and was a finalist in the 2022 MIT Sloan Sports Analytics Conference Hackathon. Recent projects include evaluating NYC's ACE bus enforcement program, analyzing curb utilization, and modeling citywide bicycle networks to support transportation planning. B.S. in Applied Mathematics; pursuing an M.S. in Data Science.

Research Foundation of The City University of New York
Training Advisor

New York, New York
November 2025 — March 2025

- Led a project-based data analytics program centered on evaluating the impacts of the MTA's ACE bus lane enforcement initiative, teaching students to apply data-driven methods to real transportation policy challenges
- Guided students through the full analytical lifecycle, including research design, data acquisition, data cleaning, statistical analysis, and visualization, culminating in the development of data-driven policy recommendations
